Professional Summary

01 INTRODUCTION

UX leader with 19+ years designing digital products across enterprise IT, e-commerce, financial services, gaming and automotive. Experience spans the full product design lifecycle - from research and personas through wireframes, prototypes and high-fidelity UI - delivered for organisations in India and the United States, including in-house leadership roles and UX consulting engagements for large enterprise clients.

Comfortable owning design end-to-end: interpreting business requirements, running usability studies and heuristic evaluations, and partnering with designers, developers and project managers to ship intuitive, user-friendly experiences.

02 PROFESSIONAL SUMMARY

Sr. UX Lead at Kyndryl (formerly IBM), driving end-to-end product design across the full innovation lifecycle - discovery, ideation, wireframing, rapid prototyping and high-fidelity UI - applying human-centered design thinking to align engineering, product and design squads around user-validated solutions. Preceded by a UX Architecture mandate at OSI Digital, translating ambiguous business requirements into scalable UI frameworks.

Prior consulting engagements span dealer-facing enterprise platforms (Toyota's Inventory Management and Pricing Engine), e-commerce experience redesign (Virgin Mobile USA), and usability research and competitive benchmarking for J.P. Morgan Chase. Built the UX research function for Electronic Arts' player help ecosystem and owned UX/UI design and iterative optimization for ZGallerie's e-commerce platform. Foundational years in interface engineering - Flex-based interactive prototyping at J.P. Morgan Chase and wireframe architecture at Prithvi Information Solutions - underpin a full-stack design fluency from pixel to system.
